Following People on Twitter

Users can follow you on the web, on their mobile device, or you can even do a "Fast Follow". See the article above for options.

Fast Follow

<https://support.twitter.com/articles/20170004>

Fast follow is a way users can just use their phone to quickly sign up to get your tweets as text messages without even having a Twitter account. Some limits apply - see the article above.

Essentially here is how it works. I would text **Follow Isnbroncos** to **40404** and I'll start receiving general updates from LSN High School.
